The figure displays three box plots, one for each state: ID, OR, and WA. Each plot shows the distribution of data for three time periods: 2018_1, 2019_1, and 2020_1. The y-axis represents a numerical value, with major ticks at 15, 20, and 25. The box plots are color-coded: gray for 2018_1, yellow for 2019_1, and light blue for 2020_1. Individual data points (outliers) are shown as small gray circles. In the ID plot, the 2019_1 distribution is shifted lower than the others. In the OR plot, the 2020_1 distribution is shifted higher. In the WA plot, the 2019_1 distribution is shifted lower, while 2020_1 is slightly higher than 2018_1.
